2. **Departure:** The aircraft introduces into the sky, and the multiplier counter begins at 1.00 x.
3. **Flight Progression:** As the aircraft flies higher, it comes across various products that increase the total payout.
4. **The Conclusion:** The round ends either when the player effectively secures their payouts, or when the airplane suffers an incident (such as running out of fuel), leading to a loss of the bet.

- **Understand Variance:** High-multiplier runs are thrilling, but they happen less regularly. Stabilize your gameplay between safe, low-multiplier cashouts and periodic high-risk flights.
