- *Withdrawal:* The user selects a skin from the site's inventory, accepts a trade offer sent via Steam, and gets the virtual item directly into their game inventory.

2. Cryptocurrency and Fiat:

- Many modern-day platforms bypass Steam trade constraints (such as Valve's 7-day trade hold) by allowing users to deposit and withdraw by means of Bitcoin, Ethereum, GBPT, or traditional credit cards and e-wallets, converting those funds into on-site currency.
