Some players increase their base bet after a streak of non-Double outcomes (psychology-based "hot-hand" method).Statistically insignificant in isolation, however can partially enhance ROI when combined with a vibrant bet-sizing algorithm. **Bankroll Segmentation**Divide the overall bankroll into 3 "pockets": (i) Regular play, (ii) Bonus-focused, (iii) High-variance "all-in" for Crazy Time only.Allows disciplined risk management, preventing a single unfortunate streak from eliminating the whole bankroll. **Timing the Host's "Big-Spin" Cue**The host sometimes indicates a "big spin" (e.g., by saying "Alright, let's get crazy!") which historically coincides with a slightly higher occurrence of benefit hits (≈ 0.5% boost).Exploiting this pattern can enhance hit likelihood, though it is not ensured and should be utilized sparingly.
