The process usually follows a particular lifecycle:

1. **Acquiring Assets:** A player grinds, purchases, or trades for high-value virtual items or currency within a video game (e.g., RuneScape Gold).
2. **Transferring to a Platform:** The gamer transfers these virtual possessions to a third-party RSP gambling site, normally by trading them to an automatic bot managed by the site.
3. **Wagering:** The platform credits the gamer's account with a corresponding balance, which is then used to play digital blackjack, roulette, crash video games, or customized minigames.
4. **Squandering:** If the gamer wins, they request a withdrawal. The website pays them out in virtual currency, which the player can then sell to gold-swapping networks or cryptocurrency brokers for real-world cash.
