What is the Towers Gambling Game?

Towers is a vertical scaling game where players try to climb up a multi-level tower without hitting a surprise risk (typically represented as a bomb, a monster, or a trap). In each row of the tower, there are several tiles to select from. Choosing a safe tile permits the player to advance to the next row, increasing their multiplier. Hitting a trap leads to an immediate loss of the bet.

Unlike traditional fruit machine where outcomes are totally out of the gamer's hands once the spin button is pressed, Towers comes from the **provably fair game category**. This means gamers make active options at every single action of the game, straight influencing their chances and potential payouts.

 - If a **safe icon** (like a coin, gem, or crown) appears, the player goes up to the next row, and their multiplier boosts.
 - If a **trap** appears, the round ends, and the bet is lost.

4. **Continue or Cash Out:** After every effective action, the player deals with an option: continue climbing for a greater multiplier or hit the "Cash Out" button to protect their present profits.
