Comprehending the Game Mechanics and Wheel Segments

The Top Slot Feature

Before every spin of the primary wheel, a secondary two-reel slot machine situated straight above the wheel spins at the same time.

- **Reel 1** displays among the betting segments (numbers or perk games).
- **Reel 2** display screens a random multiplier varying from **2x up to 50x**.

If the symbol on Reel 1 lines up horizontally with the multiplier on Reel 2, that multiplier is used to that specific bet. If the wheel arrive on that outcome, any winning bets for that sector are increased accordingly. If a multiplier arrive at a benefit game, the multiplier uses to all values inside that bonus offer round, setting the phase for possibly astronomical payments.

Dive Into the Four Bonus Rounds

The true magic-- and the highest prospective payments-- of *Crazy Time* lie within its Crazy Time Games four reward games. Setting off among these rounds transfers gamers from the primary studio into a high-production increased truth or physical set.

1. Coin Flip

- **Frequency:** 4 sections on the wheel.
- **How it works:** An easy red and blue coin is flipped by an automated maker. Before the flip, each side of the coin is appointed a random multiplier by the system. Whichever color lands face up figures out the winning multiplier for all players who wager on Coin Flip. If the multipliers are extremely low, a "Rescue Flip" can sometimes be activated for another possibility.

2. Money Hunt

- **Frequency:** 2 segments on the wheel.
- **How it works:** Players face a massive virtual screen featuring a gallery of 108 random multipliers hidden behind shooting targets (such as a cactus, a chef's hat, or a target). A countdown timer starts, and each gamer needs to utilize their cursor (or touchscreen) to aim and fire a cannon at a target of their option. When time expires, all cannons fire, exposing the private multipliers behind the chosen targets.

3. Pachinko

- **Frequency:** 2 segments on the wheel.
- **How it works:** Inspired by the standard Japanese arcade game, this bonus offer round includes a huge physical Pachinko wall filled with pegs. The host drops a glowing puck from the top of the board. As the puck waterfalls downward, bouncing off the pegs, it eventually lands in one of the slots at the bottom, which displays a multiplier. If the puck lands in a **"DOUBLE"** slot, all multipliers at the bottom of the wall double, and the host drops the puck again for even larger prizes.

4. Crazy Time

- **Frequency:** 1 sector on the wheel.
- **How it works:** The supreme reward round. The host opens a red door, leading players into a dynamic, whimsical virtual world controlled by a huge virtual wheel including 64 segments and 3 flappers (Green, Blue, and Yellow).

- **The Process:**
    1. Players select among the 3 flappers (Green, Blue, or Yellow) before the wheel is spun.
    2. The speaker presses a huge red button to spin the enormous wheel.
    3. When the wheel stops, the multiplier suggested by the player's chosen flapper is granted.
    4. If the flapper points to a **"DOUBLE"** or **"TRIPLE"** segment, all multipliers on the wheel double or triple, and the wheel spins again-- up to an optimum cap of **20,000 x**.
