Once the skins are contributed to the platform's balance, the user can put bets on a digital wheel. The wheel is usually divided into three primary categories:

1. **Red:** Usually pays 2:1.
2. **Black:** Usually pays 2:1.
3. **Green (The House Edge):** Usually pays 14:1 or higher.

The existence of the green sector is the "house edge." Without it, the game would be a coin flip. By landing on green, the home makes sure that, statistically, it will always come out on top over a long enough timeframe.
