The Truth About "Database-Registered" Certificates

The most common pitch utilized by online fraudsters is that they can place a prospect's information directly into the main IELTS database without the candidate taking the test. They frequently describe this as a "database-registered certificate."

1. **Multi-Tiered Security Protocols:** The systems used by the British Council and IDP are heavily encrypted and handled by restricted administrative personnel. They are not accessible by means of external 3rd celebrations.
2. **Biometric Verification:** Official test centers capture a photograph, signature, and sometimes finger print information of the candidate on the day of the exam.
