Instead of counting on a Random Number Generator (RNG) to deal cards-- as standard online blackjack does-- a live game features a human dealer operating from a professional studio or an actual casino floor. High-definition (HD) cameras stream the action in real-time to the player's screen, while an optical character recognition (<https://bitz.io/games/bitz-blackjack>) (OCR) system translates physical actions [live blackjack online](#) (like dealing cards) into digital information, enabling players to place bets perfectly via an on-screen interface.
