The Wheel Breakdown

The Crazy Time wheel includes 54 sectors. Each segment represents either a number (1, 2, 5, or 10) or one of the 4 bonus offer games. The distribution of the wheel sections determines the statistical probability of landing on any provided outcome.

The Heart of the Game: The Four Bonus Rounds

While banking on numbers offers consistent, smaller sized wins, the genuine excitement-- and the potential for life-changing multipliers-- lies within the four perk rounds.

- **1. Coin Flip:** A simple yet exhilarating game of opportunity. A coin with a red side and a blue side is turned by a maker. Each side is appointed a random multiplier before the flip. Whichever side lands deal with up awards that multiplier to the player's bet.
- **2. Money Hunt:** Players are provided with a massive screen featuring 108 random multipliers concealed behind shooting gallery signs (like a duck, a star, or a rabbit). Gamers utilize a virtual cannon to intend and contend a symbol, revealing their individual multiplier.

- **3. Pachinko:** Inspired by the traditional Japanese arcade video game, the presenter drops a puck down a radiant board filled with pegs. The puck bounces arbitrarily till it lands in among the multiplier slots at the bottom. If it strikes a "Double," all multipliers on the board double, and the puck is dropped once again.
- **4. Crazy Time:** The supreme bonus round. The speaker opens a red door to expose a colossal virtual wheel including 64 segments and 3 flappers (Green, Blue, and Yellow). Gamers choose one of the 3 flappers before the wheel is spun. The wheel can feature massive multipliers, and landing on "Double" or "Triple" spins the wheel again, pushing multipliers as much as an extraordinary 20,000 x.

Key Features That Make Crazy Time Unique

- **The Top Slot:** Directly above the main wheel sits a two-reel mini slot. On every single spin, the Top Slot produces a random bet area (a number or a benefit game) and a random multiplier. If the main wheel arrive on the matching spot *and* the multiplier aligns, the payment is increased exponentially.
