FAQ About Water Damage Restoration

What are the signs of water damage?

Signs of water damage include discoloration on walls or ceilings, peeling paint, damp or musty odors, and visible mold growth. Additionally, you may notice swollen or warped flooring and drywall, as well as water stains or increased humidity levels in the area.

How long does water damage restoration take?

The duration of water damage restoration can vary greatly depending on the extent of the damage, the size of the affected area, and the response time. Typically, the process may take anywhere from a few days to several weeks to complete, including assessment, drying, and repairs.

Can I clean up water damage myself?

While minor water damage may be manageable with DIY methods, professional assistance is often recommended for extensive damage. Professionals have the equipment and expertise to effectively remove water, mitigate mold risks, and restore your property safely.

What should I do immediately after water damage?

Immediately after water damage, prioritize safety by turning off electricity and water sources. Remove excess water using mops or towels, ventilate the area to promote drying, and contact a restoration specialist for further assessment and assistance.

Is water damage covered by insurance?

Many homeowners insurance policies cover water damage, but coverage can vary based on the cause and policy specifics. It's important to review your policy details and consult with your insurance provider to understand your coverage and filing process.
