What is a Mines Casino Game?

The core facility is simple: players exist with a grid (normally 5x5) covert below tiles. Beneath these tiles lie 2 types of products: **safe stars/gems** and **covert mines**.

The objective is to discover as many safe tiles as possible without striking a mine. Each time a safe tile is exposed, the player's multiplier increases. Gamers can pick to cash out their payouts at any time before striking a mine, adding a thrilling component of risk management and individual control that conventional slots do not have.

Secret Terminology in Mines

- **Grid Size:** The measurements of the playing field, most typically 5x5 (25 tiles total), though some platforms offer personalized grids.
- **Mine Count:** The variety of surprise risks positioned on the grid. Gamers typically can adjust this number before starting a round. Greater mine counts increase the risk and the payment multiplier per tile.
- **Multiplier:** The factor by which the initial bet is multiplied upon a successful cashout.
- **Cashout:** The act of protecting current jackpots and ending the round securely.

2. **Set up the Board:** The gamer selects the variety of mines they want to hide in the grid.
3. **Start the Round:** The gamer clicks "Bet" or "Play," which covers the grid with clickable tiles.
4. **Reveal Tiles:** The player clicks tiles one by one. Each safe tile turns green and increases the possible payment.
5. **Choose to Continue or Cash Out:** After every successful expose, the player faces an option: click another tile to increase the multiplier, or strike the "Cash Out" button to gather the present jackpots.
6. **End of Round:** The round ends effectively if the player cashes out, or immediately ends in a loss if a covert mine is revealed.

The Math Behind the Game: Risk vs. Reward

Number of Mines Threat Level Multiplier for 1st Safe Tile Multiplier for 3rd Safe Tile Multiplier for 5th Safe Tile
1 Mine Very Low 1.02 x 1.09 x 1.18 x **3 Mines** Low-Medium 1.12 x 1.45 x 1.96 x **5 Mines** Medium 1.24 x 1.96 x 3.26
x **10 Mines** High 1.65 x 4.36 x 14.19 x **20 Mines** Extreme 4.95 x 247.50 x *Extremely Rare*

(Note: Exact multipliers may differ somewhat depending upon the particular software application supplier and house edge settings of the online casino.)
