How the Game Works: Core Mechanics

To truly master the skies, a gamer needs to first comprehend the fundamental mechanics of the game. While specific functions can vary a little depending upon the specific platform hosting the game, the universal structure stays constant.

The Flight Phase

Once a round starts, the aircraft takes off the runway and begins its climb. As it climbs, a multiplier counter starts ticking up-- starting at 1.00 x and continuing to rise. The longer the flight continues without event, the greater the multiplier goes.

The Descent and Hazards

The skies are seldom clear. Along the flight path, different aspects appear that can either improve the player's score or prematurely end the run. These can consist of favorable tailwinds, fuel increases, storm clouds, or sudden elevation drops.

Squandering

The defining mechanic of Avia Masters is the aspect of risk versus benefit. Players need to choose the optimum moment to "cash out" or protect their progress. Wait too long, and an unexpected hazard might crash the aircraft, leading to a lost round. Squander prematurely, and gamers might lose out on huge multipliers.

Game Phase Description Player Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Location preliminary criteria or start the round. **Ascent** The airplane takes off; multipliers begin to climb up. Monitor the flight course and see the multiplier grow. **Mid-Flight** Browsing threats, gathering perks, and assessing risk. Decide whether to hold on or secure the current rating. **Resolution** The flight ends either through an effective cash-out or a crash. Collect rewards and prepare for the next round.
