How Glassbusters Works With Remodelers Near Baseline and Guadalupe Roads Bathroom remodelers working in south Mesa between Baseline Rd and Guadalupe Rd tend to save the shower glass for last, and with good reason. It is the final piece of a job that involves demolition, plumbing, waterproofing and tile, and it depends on all of those being finished first. Glassbusters Inc. works with remodelers, custom home builders, interior designers, investors and landlords as well as homeowners, so fitting into the end of someone else's project is familiar territory. For a contractor, the main concern is scheduling. Glassbusters offers free quotes on glass shower doors over the phone, and contractors can text or email photos and rough measurements while the tile is still going in. That gives the homeowner a price and a design to approve before the shower is complete. Once the tile and curb are finished, a team member comes out for the in-home precise measure. Measuring at that stage, rather than from plans, means the glass is cut to the surfaces as they actually are. Contractors can also flag unusual details early, such as a bench, niche or steam generator, so the glass design accounts for them. After the measure, the glass is custom cut locally and the typical timeline runs one to two weeks from an approved design. One of the review themes for the business is a contractor-recommended shower door with honest pricing and glass arriving

in about two weeks, which lines up with that timeline. Most installs are completed in a single visit, so the remodeler is not waiting on a drawn-out process before the final walkthrough with the client.

Remodelers also care about who is working in their client's home. Glassbusters technicians are described as CrimShield certified, background checked and fully insured, and the company is licensed and insured. Reviews mention courteous staff and installers who clean up after themselves, which matters when the bathroom has just been finished and the homeowner is inspecting every surface. The company states a full workmanship guarantee, and its premium hardware is chosen for desert conditions, so the glass holds up after the remodeler has handed over the keys. If a homeowner wants privacy glass, a steam enclosure or a specific hardware finish, those [glass shower doors](#) choices are confirmed before cutting, so there are no surprises on installation day. Baseline and Guadalupe Roads are a few miles south of the shop on E Broadway Rd. Remodelers who want to set up glass for upcoming jobs can call Glassbusters at (480) 994-5855 between 8am and 4pm, Monday to Friday, or visit 518 E Broadway Rd, Mesa, AZ 85204.

Glassbusters Inc. Address: 518 E Broadway Rd, Mesa, AZ 85204 Phone: (480) 994-5855 FAQ About Glass Shower Doors How much do glass shower doors cost in Mesa, AZ? Custom glass shower doors in the Phoenix area typically range from \$800 to \$2,500, depending on size, style and hardware. Semi-frameless doors and simple sliding tub doors usually sit lower in that range, while frameless doors and multi-panel enclosures sit higher. Glassbusters Inc. gives free phone quotes from photos or rough measurements, so you can see where your shower falls before anyone visits. Are frameless glass shower doors worth the extra cost? Frameless doors cost more upfront because they use thicker tempered glass and heavier hinges, but many homeowners feel the open look and easier cleaning are worth it in a bathroom used every day. In older homes with uneven walls, a semi-frameless door can be the smarter value. Isaac and the Glassbusters team can send photos of both styles during a free, no-pressure consultation. What is the difference between frameless and semi-frameless shower doors? A frameless door is heavy tempered glass held only by hinges and clamps, with no metal around the edges. A semi-frameless door uses some metal channel for support, which allows thinner glass and a lower price. Glassbusters Inc. installs both from its shop on E Broadway Rd in Mesa and measures every opening in person before the glass is cut. How thick should the glass be for a shower door? As typical industry practice, frameless doors commonly use 3/8 inch or 1/2 inch glass, and semi-frameless doors often use 1/4 inch glass with metal channel for support. Larger frameless panels are often made in 1/2 inch for extra rigidity. Glassbusters recommends a thickness based

on the door style, panel size and hardware, and all shower glass is tempered. How long does it take to get a custom glass shower door installed? The typical timeline is one to two weeks from an approved design. After a free phone quote and a precise in-home measure, the glass is custom cut locally, and most installs are completed in a single visit. Glassbusters Inc. is open Monday to Friday, 8am to 4pm, for scheduling. How do you keep glass shower doors clean with Arizona hard water? Squeegee the glass after every shower so minerals cannot dry on the surface, and use a mild, non-abrasive cleaner with a soft cloth once a week. A protective coating helps water bead and run off, and designs with fewer tracks give deposits fewer places to collect. Glassbusters chooses hardware for desert conditions and can explain coating options during your quote. Can a glass shower door be installed if the walls are not square? Yes. Out of square walls are common in older Mesa and Tempe homes, and the answer is careful measurement at several points and glass custom cut to follow the real shape of the opening. Glassbusters Inc. reviews mention a difficult install with walls out of square that the crew handled successfully. Is a sliding or hinged glass shower door better for a small bathroom? A sliding door suits tubs and rooms where a swinging door would hit a toilet or vanity, because it stays within its own footprint. A hinged door gives a wider, cleaner opening for walk-in showers, but it needs clear space to swing outward. For very tight rooms, Glassbusters also offers bifold doors and narrow hinged doors beside a fixed panel. What type of glass is used for shower doors? Shower doors use tempered safety glass, which is much stronger than ordinary glass and breaks into small, blunt pieces if it ever fails. Because tempered glass cannot be cut afterward, every hole and dimension must be set first. That is why Glassbusters Inc. measures each opening in the home before the glass is custom cut locally. Can I get privacy glass on a shower door? Yes. Glassbusters offers frosted and opaque glass for shower doors and panels, either for the whole enclosure or only the side facing a window or bedroom. Frosted glass still lets light through while blurring shapes. Call (480) 994-5855 to ask for photos of privacy options. Can I get a shower door quote from photos? Yes. Glassbusters Inc. gives free phone quotes based on photos or rough measurements, and you can text or email them, so no in-home visit is needed for an estimate. Include a photo of the space in front of the shower so the team can check door swing. A precise in-home measure follows once you approve a design. Do glass shower doors add value to a home? New glass shower doors can make a bathroom look brighter and more up to date, which helps in listing photos and removes a visible item from a buyer's to-do list. No glass company can promise a specific sale price, but many Mesa sellers update dated framed doors before listing. Glassbusters Inc. can usually install within one to two weeks of an approved design.
