What is a Crash Game?

Before diving into the specifics of Avia Masters, it helps to understand the underlying genre. Crash games are a modern design of online betting and arcade-style entertainment. Unlike standard video games with predetermined results determined by intricate reel setups, crash games revolve around a single, main mechanic: **an increasing multiplier**.

In a typical crash game:

1. Players position a wager before the round starts.
2. A multiplier starts at **1.00 x** and climbs up in real-time.
3. An object (in this case, an airplane) takes flight, and the multiplier increases the longer it remains in the air.
4. The item can "crash" or fly away at any unforeseeable moment.
5. Players need to squander *before* the crash to secure their payouts multiplied by the current rate. If the item crashes before a cash-out, the wager is lost.
