Understanding the circulation of these sectors is important for handling bankrolls and understanding the video game's volatility.

3. **Cash Hunt** (2 segments on the wheel)

The Four Thrilling Bonus Rounds Explained

When the wheel stops on a perk section, all players who positioned a bet on that specific perk round are transported to a separate, immersive set (or enhanced truth screen) to participate.

1. Coin Flip

The easiest of the benefit rounds, Coin Flip includes a coin with a Red side and a Blue side. Each side is appointed a random multiplier by the video game system before the flip. The host pulls a lever to turn the coin, and whichever side lands face up awards the player that matching multiplier. If multipliers are low, a "Rescue Flip" can often be set off for a 2nd possibility.

2. Pachinko

Influenced by the conventional Japanese arcade game, the Pachinko bonus offer round features a massive wall filled with physical pegs. The game host drops a puck from the top of the board, and it bounces randomly down through the pegs up until it lands in one of the multiplier zones at the bottom.

- If the puck lands on a **"Double"** value, all multipliers at the bottom of the wall double, and the puck is dropped again for even greater stakes.

3. Cash Hunt

Cash Hunt is an interactive shooting gallery minigame. Gamers exist with an enormous screen showing 108 random multipliers concealed behind various signs (such as a cactus, a target, or a chef's hat).

- Gamers use an on-screen crosshair to aim and "shoot" their chosen symbol before the timer runs out.
- Once time ends, all symbols reveal their surprise multipliers, and gamers get the multiplier connected to their selected target.

4. Crazy Time

The crown jewel of the game is the Crazy Time bonus offer round. Players stroll through a red door into a dynamic, virtual wonderland featuring an enormous, 64-segment mega wheel.

- Before the wheel is spun, players must choose among 3 flappers: **Green, Blue, or Yellow.**

- The wheel is spun, and whichever multiplier the chosen flapper indicate is awarded to the player.
- Simply like Pachinko, this wheel includes "**Double**" and "**Triple**" segments. If the flapper arrive at among these, the multipliers on the wheel increase, and the wheel is spun again-- possibly pressing payments as much as the game's optimum limitation of **20,000 x**.
