

O-Town Plumbing & Heating installs water heaters for new construction and major renovation projects throughout Ogden, working with homeowners and builders on properly sized systems. Selecting the right water heater capacity and type during construction helps avoid the inconvenience and expense of an inadequate system needing early replacement. The company's team can advise on tankless versus traditional tank options during the planning stage, helping builders and homeowners make an informed choice from the outset.

O-Town Plumbing and Heating | 1962 S 1850 E St, Ogden, UT 84401 | (801) 643-5784

Proper installation during new construction also ensures the system meets current code requirements and integrates [Plumber near me](#) correctly with the home's broader plumbing design. For new construction water heater installation in Ogden, call O-Town Plumbing & Heating at (801) 643-5784.
